Become a

Science Ambassador

UNIVERSITY OF MINNESOTA

Discover the Science Ambassador Program

The University of Minnesota Institute of Technology Alumni Society, in partnership with the Institute of Technology Office of Diversity and Outreach, is pleased to announce a new initiative called the Science Ambassador Program. Beginning this fall, mentors and students are invited to participate in this partnership program that connects the Institute of Technology with a middle or high school in the metro area. The purpose of the partnership is multifold:

- provide a professional and undergraduate student role model for students grades 6–12;
- promote science or engineering as a career;
- share the college experience; and
- demonstrate and assist in hands-on activities

This new initiative aligns with both the University of Minnesota’s mission to support dynamic public engagement and the Institute of Technology’s mission to promote a diverse workforce and informed public in the fields of science, technology, engineering, and mathematics (STEM).

As part of the program, the mentor and student will receive a short (30-minute) training session with a representative from the IT Office of Diversity and Outreach. The training session will cover what to expect in the classroom, and suggestions for presentations and demonstrations, as well as information about scheduling your visit and connecting with the teacher.
