Integrate and Implement

Application Guide

View Community-Contributed Implementation Resources

See the UMN Community Shib GitHub Group

https://github.umn.edu/umn-community-shib

You must be an active Student, Staff, or Faculty member to view this page.

Configure Your Application to use your Shibboleth SP

Use the UMN Shib Auth Ruby Gem

https://github.umn.edu/asrweb/umn_shib_auth

Configure Devise to use your Shibboleth SP

https://github.com/jgeorge300/devise_shibboleth_authenticatable

(for web apps that use Ruby on Rails' Devise framework)

Configure Apache to use your Shibboleth SP

/services-technologies/resources/configure-apache-use-your-shibboleth-sp

(for controlling access to web pages served by Apache httpd)
