Self-Help Guide

Leaving the University

As faculty, staff, students, or associates of the University of Minnesota, you have access to many technology services and systems. When you leave the University, access to many or all of these will change.

Use this guide to prepare for the transition, ensure you still have access to personal content, and enable the University to retain access to University-owned content and equipment.

Notes:

- This guide is not exhaustive. If you have questions about access to specific services or systems, please contact your departmental IT unit or Technology Help.
- The Office of Human Resources has additional information for faculty or staff Leaving the U and supervisors who are managing a Departure from the University.
- For more details and information about these transitions, you can visit the Changes to UMN email and Google Workspace page.

Leaving the University

Review When Your Access Will Change

Faculty Emeriti
As an emeritus faculty member, once you have retired from the University of Minnesota, your access to technology systems and services like University WiFi and Google Workspace will change.

**Reviewing Technology Access Changes**

You will lose access to the following technology systems and services immediately when you retire:

- Virtual Private Network (VPN)
- Microsoft Office 365 and other Microsoft-related products, such as MS Azure
- Ability to login to University-owned computers via Active Directory
- UCard building access
- Zoom accounts

You will **retain** access to your Google Workspace account if you log in **at least once a year**. This includes:

- Gmail
- Google Calendar
- Google Drive

**Faculty & Staff (Non-Emeritus, not in a Health Care Component)**

When you leave the University of Minnesota, your access to technology systems and services like University WiFi and Google Workspace will change.

**Note:**

- The following does NOT apply to faculty and staff who are a part of a Health Care Component.

**Reviewing Technology Access Changes**

You will lose access to the following technology systems and services **immediately**:

- University WiFi (eduroam)
• **Virtual Private Network** (VPN)
• **Microsoft Office 365** and other Microsoft-related products, such as MS Azure
• Ability to login to University-owned computers via Active Directory
• **UCard** building access
• **Zoom**

**Google Workspace (including UMN Email)**

• If you retired or will retire before June 1, 2024, you will retain access to your Google Workspace account for up to 1 year after your retirement date.
• If you leave the University as a faculty or staff member for any reason (including retirement) on or after June 1, 2024, you will retain access to your Google Workspace account for up to 21 days after your retirement date.
• Google Workspace includes:
  - Gmail (UMN Email)
  - Google Calendar
  - Google Drive
• Learn more about [Changes to UMN Email and Google Workspace](#).

**Health Care Component Faculty & Staff (Non-Emeritus)**

When you leave the University of Minnesota, your access to technology systems and services like University WiFi and Google Workspace will change.

**Reviewing Technology Access Changes**

You will lose access to the following technology systems and services immediately:

• **University WiFi** (eduroam)
• **Virtual Private Network** (VPN)
• **Microsoft Office 365** and other Microsoft-related products, such as MS Azure
• Ability to login to University-owned computers via Active Directory
• **UCard** building access
• **Zoom**
If you leave the University before June 1, 2024 for reasons other than retirement, you will retain access for 21 days.

If you are faculty who do not have emeritus status or are staff who retire from the University before June 1, 2024, you will retain access to your Google Workspace account for up to 1 year after your retirement date.

If you leave the University for any reason (including retirement) and do not have emeritus status on or after June 1, 2024, you will retain access to your Google Workspace account for up to 1 day.

Google Workspace includes:
  - Gmail (UMN Email)
  - Google Calendar
  - Google Drive

Learn more about Changes to UMN Email and Google Workspace.

Person of Interest (POI)

When your Person of Interest (POI) account expires, your access is immediately removed for all University of Minnesota technology systems and services. POI accounts are not eligible for any access transition period.

Students (not in a Health Care Component)

When you leave the University of Minnesota, whether by graduating or by not enrolling in an upcoming semester, your access to technology systems and services will change.

Note: The following does NOT apply to students who are a part of a Health Care Component.

Reviewing Technology Access Changes

You will lose access to the following technology systems and services immediately upon graduation or at the end of the last semester you have registered for:

  - University WiFi (eduroam)
  - Virtual Private Network (VPN)
• **Microsoft Office 365**
• Ability to login to University-owned computers via Active Directory
• **UCard** building access
• **Zoom** accounts

You will retain access to your **Google Workspace** account for up to 1 year after your graduation date or the end of the last semester you registered for. This includes:

• Gmail
• Google Drive
• Google Calendar

**Health Care Component Students**

When you leave the University of Minnesota, whether by graduating or by not enrolling in an upcoming semester, your access to technology systems and services will change.

**Reviewing Technology Access Changes**

You will lose access to the following technology systems and services immediately upon graduation or at the end of the last semester you have registered for:

• **University WiFi** (eduroam)
• **Virtual Private Network** (VPN)
• **Microsoft Office 365**
• Ability to login to University-owned computers via Active Directory
• **UCard** building access
• **Zoom** accounts

**Google Workspace (including UMN Email)**

• If you graduated or will graduate **before June 1, 2024**, you will retain access to your Google Workspace account for up to **one year after your graduation date**.
• If you will graduate **after June 1, 2024**, you will retain access to your Google Workspace account for up to **30 days after your graduation date**.
• **Google Workspace** includes:
More than one affiliation

If you are a faculty or staff member who is also a recent student, you will receive the longer (student) transition period.

A recent student is defined someone who enrolled in most recent semester, but did not enroll in the upcoming semester (excluding summer term).

- A student who enrolls in fall term will become a "recent student" after the end of Fall Semester but before the start of Spring Semester if they do not enroll in for-credit courses.
- A student who enrolls in Spring Semester will become a "recent student" after the end of Spring Semester, but before the start of Fall Semester if they do not enroll in for-credit courses.

Multiple Affiliation Transition Period

Health Care Component

A person who is departing and is a faculty/staff member who is also a recent student receives a 30 days transition period. After 30 days, their email and Google Workspace account will be closed. See details in the "Health Care Component" menu item for details about access changes.

Non-Health Care Component

A person who is departing and is a faculty/staff member who is also a recent student receives a 365 days transition period. After 365 days, their email and Google Workspace account will be closed. See details in the "Students (not in a Health Care Component)" menu item for details about access changes.
Review Healthcare and Student Privacy Account Restrictions

Review Health Care Component and Student Privacy Restrictions

University and federal policies apply to content in your UMN email, your Google Drive files, and on your University-owned devices. You should understand the Family Educational Rights and Privacy Act (FERPA), Health Insurance Portability and Accountability Act (HIPAA) and other related data policies and be careful what you choose to transfer before leaving the University.

If you are in the Health Care Component (also known as the BAA), transferring of any files or content that contain PHI is prohibited under federal HIPAA laws.

You can learn more from the Health Information Privacy and Compliance Office and the FERPA Resources page.

Prepare University Email for Your Transition

Create a Personal Email Account If Needed

To ensure a smooth transition when you leave the University, it’s helpful to have a personal email account for your use. If you want to transfer personal emails and documents from your UMN email account, you should create a Gmail account.

Note: When transferring data, you are responsible for complying with HIPAA, FERPA, and any other regulations or policies regarding Protected Health Information and Protected Student Information. You can learn more from the Health Information Privacy and Compliance Office and the FERPA Resources page.

Creating Gmail Accounts

Follow the instructions in the Google Support article Create a Gmail Account to start your new Gmail account. This process takes only a few minutes.
After you’ve created your new account, you can discover more about its functions at Google's Account Overview page.

Creating Non-Google Email Accounts

You can also create a free personal account with other email providers.

- Outlook
- iCloud mail
- Yahoo mail
- Protonmail
- AOL

Share Your Personal Email Address with the University

When leaving the University of Minnesota, it’s helpful to update your contact information, including adding a personal email address. This enables the University of Minnesota to stay connected with you.

Current faculty, staff, and students can visit MyU to update your email preferences.

1. Go to the My Info tab in MyU.
2. Select Edit in the Email block.
3. Select Add an Email Address.
4. Select Home as the Email Type.
5. Enter your personal email address in the Email Address field.
6. Select Save.

Former faculty, retirees, and students can visit update.umn.edu.

Set Up an Automated Email Reply

Before leaving the University of Minnesota, you can set up an automated email reply using the Vacation Reply option in your UMN email account to inform people of the change.
Note: Once your account is deactivated, automatic responses will no longer be sent. Emails sent to your account at this point will be returned as undeliverable.

Creating an Automatic Vacation Reply

While your account is still active, you can create an automatic vacation reply.

Message Template for Retired Faculty, Staff, and Former Students

Greetings!
I hope this message finds you well. I have recently changed my primary email address to [NewEmail@example.com]. This change is effective immediately. Going forward, please contact me at the email address mentioned above.
[Your Full Name]
[Your Phone Number]

Message Template for Faculty and Staff who are leaving in the future

Greetings!
I am leaving the University of Minnesota effective [Date of Departure]. Please direct needs or inquiries to [current faculty or staff member].
[Your Full Name]

Opt In to Create a New UMN Alumni Email Account If You are Eligible

If you graduated or retired from the University before June 1, 2024, you are eligible to enroll in an email-only alumni account.

UMN alumni email accounts provide an edu email address. They do not include other Google Workspace applications such as Drive, YouTube, Jamboards, etc.

Enrolling in a UMN Alumni Email Account

1. Make sure you have a non-UMN email address. This will be required by Google when opting in for the UMN alumni email account.
2. Follow the directions found on the enrollment form.
- **Note**: You will see “Account Not Eligible” if you are not eligible for a new UMN Alumni Gmail Account. If you believe that you should be eligible, contact [email help](mailto:help@umn.edu).

For more details refer to [Opt-In Alumni Email Account](mailto:help@umn.edu).

**Remove University Google Account from Your Personal Devices**

When you are leaving the University, you should ensure your University Google account is removed from any personal devices such as your personal phone, computer, or tablet.

**Removing University Gmail Accounts**

Refer to the following resources to sign out of and remove University Google Accounts, like Gmail and Google Workspace, from your personal devices.

**Sign out of accounts on your devices**

- [Sign Out of Gmail](mailto:help@umn.edu)
- [Sign Out of Chrome](mailto:help@umn.edu)
- [Sign Out of Google Drive](mailto:help@umn.edu)

**Remove work-related apps from your devices**

- [Install and Uninstall Apps - Google Play](mailto:help@umn.edu)
- [Remove Apps from iPhone](mailto:help@umn.edu)

**Update your email address in Apple ID and/or Google Play**

- [Change your Apple ID](mailto:help@umn.edu)
- [Change your Google Play email settings](mailto:help@umn.edu)

**Update Your Email for Subscriptions, Memberships, and Non-UMN Accounts**
When you leave the University, you need to provide your personal email address to any outside organizations that previously used your UMN email address.

It is important to do this before you leave the University because you may not have access to your UMN email address and other systems and services once you depart. Changing your associated email address with these organizations will help prevent a loss of account access or service.

Use a Google doc checklist as a starting point to track the places you've updated:

1. Follow this link for the Google Doc: [Example Update Contacts Checklist](#)
2. Select Make a Copy to make a copy of the checklist for your own personal use.

**Move or Delete Your Personal Files and Data**

**Assess Personal vs. University Data Ownership**

Before leaving the University, you may need to determine whether certain data belongs to you or to the University. After you’ve assessed which category data falls into, you will need to ensure it is stored in an appropriate location and accessible to the appropriate people.

**Understanding Data Type and Location**

Data exists in many different locations (e.g., applications like Outlook, your computer’s desktop, Google drive). Also, types of data vary widely (e.g., contact information, documents, and videos). When assessing whether data belongs to you or to the University, you’ll review both the location and the type of data.

**Understanding Data Ownership**

If you have questions about data ownership, you can consult with your supervisor and/or department. You can also refer to the following resources for more details:

- [Managing University Records and Information](#)
- [Owning and managing academic rights](#)
- [Copyright Ownership](#)
Export Your Google Contacts

To export Google contacts, follow Google's instructions to Add, move, or import Contacts from Another Google Account.

Move Your Google Calendar Events

To move Google Calendar Events, follow Google's instructions to Import Calendar Events from Another Google Calendar.

Move and/or Delete Personal Gmail and Files from Google Drive

Before leaving the University, you can move emails from your UMN Gmail and any other Google Drive files that you own from your University Google Workspace to your personal Google account or non-Google account. The University recommends using either Google Takeout Transfer or VaultMe.

- Google Takeout Transfer is a free service available to all Google accounts, including UMN Gmail accounts.
- VaultMe is an enhanced data migration tool available to UMN Gmail account holders at a 10% discount.

Note:
- When transferring data, you are responsible for complying with HIPAA, FERPA, and any other regulations or policies regarding Protected Health Information and Protected Student Information. You can learn more from the Health Information Privacy and Compliance Office and the FERPA Resources page.
- If you are part of a Healthcare Component at the University, your account is likely included as a member of the Business Associate Agreement (BAA). In this case, you will not be able to transfer or download your data using the steps.
Using Google Takeout Transfer

Transferring Your Data to Another Google Account

Visit Google's support article [Copy content from your school account to another account](https://support.google.com/umn) for complete instructions on how to transfer your data.

Transferring Your Data to a Non-Google Account

If you would like to transition to a different email service than Google, follow the instructions to [Download Google Data with Google Takeout](https://support.google.com/umn).

Troubleshooting Google Takeout Transfer

If you encounter issues while using Google Takeout Transfer, try following these suggested fixes:

- Make sure you start the transfer while logged into your UMN Gmail.

1. Go to [mail.umn.edu](https://mail.umn.edu)
2. If necessary, log in with your UMN Internet ID and password.
3. Select the Google Account image in the upper right. This may be your picture or your initials. A pop-up window should display your UMN email address at the top.
4. Continue following the Google Takeout Transfer process.

- If you are not logged into the correct account, try signing into your UMN Gmail account in a different browser (e.g., Safari, Chrome, Firefox, Edge) or open a private browser window.
- If the transfer process fails, try exporting just one type of content at a time. For example, you can first transfer your email data. Then, when this has completed, start a second transfer of your Google Drive data.

Using VaultMe
VaultMe is an enhanced data migration tool available to UMN Gmail account holders at a 10% discount.

1. Visit VaultMe for UMN and select Try VaultMe for UMN.
2. Follow the directions to learn about the tool and provide your account information.
   1. You will get a price quote before you decide to use this service.
   2. Upon completing the final step, VaultMe provides information for contacting their support if you are experiencing any issues with their data migration tool.

**Move and/or Delete Personal YouTube Videos**

Videos uploaded to the YouTube channel associated with your UMN account cannot be transferred directly to a different channel. To avoid losing your YouTube uploads, follow Google's instructions to download and reupload the videos manually.

**Move and/or Delete Personal Files Off of University-owned Device(s)**

Before leaving the University, you should move any personal files off of University-owned computers, tablets and phones before turning in those devices.

**Note:** When transferring data, you are responsible for complying with HIPAA, FERPA, and any other regulations or policies regarding Protected Health Information and Protected Student Information. You can learn more from the Health Information Privacy and Compliance Office and the FERPA Resources page.

Depending on the device, use one of the following methods to store your personal files:

- External hard drives or flash drives.
- Cloud solutions include Amazon, Crashplan, Dropbox, or iCloud, among others.

**Prepare University Data for Your Transition**
Assess Personal vs. University Data Ownership

Before leaving the University, you may need to determine whether certain data belongs to you or to the University. After you’ve assessed which category data falls into, you will need to ensure it is stored in an appropriate location and accessible to the appropriate people.

Understanding Data Type and Location

Data exists in many different locations (e.g., applications like Outlook, your computer’s desktop, Google drive). Also, types of data vary widely (e.g., contact information, documents, and videos). When assessing whether data belongs to you or to the University, you’ll review both the location and the type of data.

Understanding Data Ownership

If you have questions about data ownership, you can consult with your supervisor and/or department. You can also refer to the following resources for more details:

- Managing University Records and Information
- Owning and managing academic rights
- Copyright Ownership
- Copyright Policy Background and FAQs
- Frequently Asked Questions About IP
- Acceptable Use of IT Resources policy

Assess Retention Status of University Records

Some types of University-owned records may need to be retained and stored for a specific period of time, whereas other types must be deleted when they are no longer actively in use.

Determining Record Retention Status

Use the following resources to determine whether your University-owned emails, documents, spreadsheets, presentations, etc., should be retained or deleted:

- Records Retention Schedule
Change Ownership of Files in Google Drive

Before leaving the University, you should make sure to transfer ownership of all documents, sheets, slides, forms, and other files that you own in Google Drive to currently-employed faculty or staff members or to an appropriate shared drive.

To do so, refer to the following self-help articles:

- Make someone else the owner of your file
- Move files & folders into shared drives

Move Files on Your Computer to Appropriate Storage

Before leaving the University, you should make sure to move all work files (Word, Excel, Powerpoint, PDF, image, etc) off of your computer to a location available to the appropriate currently employed faculty or staff member.

- Use the Records Retention Schedule to determine which work files need to be stored.
- Use Select Digital Storage Options to find the best location for your work files.

Change Ownership of Files in Box

Body

There are two ways to change or transfer folder ownership to another collaborator. Through the Collaborators menu in the right pane of a folder or from the Collaborators page of a folder. If your folder only has a few collaborators the Collaborators menu will probably work best. If you have a long list of collaborators and you need to find a specific one you may want to use the Collaborators page.

In this article:
Understand Implications of Changing Ownership

- To change or transfer folder ownership, you must be the owner of the folder.
- Once ownership is changed, the collaborator you designate will be the new Owner of the folder and your access level will be downgraded to Editor. The contents of the folder will no longer count against your account's storage allowance.
- If you want to transferring a private (yellow) folder, you will first need to invite the other person as a collaborator to this folder before you can you transfer ownership.
- Large folders (containing 10KB files or more) may cause the transfer to time out. If you experience any issues contact Technology Help.

Change Ownership From the Collaborators menu

1. In Box, open the folder you want to change ownership for. You will see a list of Collaborators in the right pane. If you are the owner, the word Owner will appear under your name.
2. Find the collaborator you want to give ownership to.
3. Select More Options (three dots) to change collaborator permissions.
4. Select Owner from the drop-down.
5. Select Okay to confirm the change.

Change Ownership From the Collaborators page
1. In Box, open the folder you want to change ownership for. You will see a list of Collaborators in the right pane. If you are the owner, the word Owner will appear under your name.

2. Select any collaborator's name in the right pane to open the collaborators page and view all the collaborators for this folder.

3. Under Permissions, select the current role for the collaborator you wish to make the new owner. Select Owner from the menu.

4. Select Okay to confirm the change.

### Change Ownership for an Individual File

1. In Box, open the file you want to change ownership for.

2. Select Share, then Manage People in the upper right to open the collaborators page and view all the collaborators for this folder.

3. Under Permissions, select the current role for the collaborator you wish to make the new owner. Select Owner from the menu.

4. Select Okay to confirm the change.

### Change Google Calendar and Event Ownership

Before leaving the University, you should transfer ownership of any shared Google Calendars that you created to currently-employed faculty or staff members.
In addition, you should also transfer ownership of recurring calendar events (such as weekly team meetings) to currently-employed faculty or staff members.

Refer to **Transfer Google calendars or events** to get started.

**Change Google Group Ownership**

Before leaving the University, you should transfer ownership of Google Groups you manage to another member of the Group.

**Managing Google Groups**

To find the Google Groups you own or manage, review who is a part of the group, and change the ownership, refer to the following self-help articles:

1. [Find the groups you own.](#)
2. For each group, select **Members** under People on the left.
3. Find the individual who should be the new owner.
4. Select the role dropdown arrow next to that individual and choose **Owner**.

**Leaving Google Groups**

The Office of Information Technology recommends leaving Google Groups before you depart so that active members don’t attempt to contact you using the group. Refer to **leave a group or unsubscribe from email** to get started.

**Update Voicemail Message and Password**

As a staff or faculty member, when you leave the University, there are a few steps you can take to ensure that people calling your University phone number know you have left the University.

- Record a voicemail greeting that directs contacts to an appropriate contact.
  - Refer to **Setting a No Answer Greeting**.
- Share your voicemail password with your supervisor so they can monitor any voicemails after you leave.
For other voicemail options, refer to the Unified Communications: Set Up and Use Your UMN Voicemail self-help guide.

Change Ownership of Media/Recordings and Channels in Kaltura

Change Ownership of Media/Recordings in Kaltura in Canvas and MediaSpace

Before leaving the University, locate media you own in Kaltura and change ownership to appropriate faculty or staff members who are currently employed. Prioritize recordings that will be used in Kaltura in Canvas and MediaSpace after you leave. Refer to Changing Media Owner steps for more information.

Change Ownership of Channels in Kaltura MediaSpace

Before leaving the University, change ownership of any channels you own in Kaltura MediaSpace to appropriate faculty or staff members who are currently employed.

Prepare Research Data for Your Transition

Update Publications with Your Current Contact Information

If you are graduating or moving to a different institution, you will want to receive communications related to your published papers, such as citation alerts, feedback, or requests for collaboration.

You will have one year after graduation to update publishers with your new email address and to update your Open Researcher and Contributor ID (ORCid).

Taking Action

Contact the journal or conference organizers: Reach out to the editorial team or conference organizers of the publication where your paper was accepted. Explain the situation and provide alternative contact information, such as your current email address. They may be able to update their records and ensure that you receive relevant communications.
Check the publication's website: Visit the website of the journal or conference where your paper was published. Many publications provide contact information for authors, and you may find details on how to update your contact information.

Contact the publisher: If your paper was published by a reputable publisher, contact them directly. Publishers often maintain records of authors and may assist in updating your contact information.

Collaborate with co-authors: If you have co-authors, check if any of them can still be reached through the original email address or if they have information on how to update contact details.

Create an online researcher profile: Create an ORCID id and make sure your contact information is up-to-date there. This can serve as an additional means of communication.

Maintain records: Keep a record of the email address used for paper submissions and ensure that it is linked to a reliable and enduring email account.

Know What Data Can Go and What Data Should Stay

- **Talk with your collaborators, PI, or research advisors** to determine what you should transfer, move, or take with you.
- **Review University policy.** Research Data Management: Archiving, Ownership, Retention, Security, Storage, and Transfer
- **Review your data** to see if you need to transfer ownership of files containing research data and documentation to a collaborator with an active UMN account.
  - Google Workspace: Make someone else the owner of the document.
  - Google Workspace: Move files to a shared drive.
  - Box: Transfer data when leaving the University.
- **For PIs: Make sure you have a plan** for how you want students and other collaborators to store and share research data. Ensure that you collect new contact information before they leave the University or your research project.
- **For Students: Take an online self-paced course,** such as Managing Data When You Graduate
Continue to Collaborate on Research After Leaving UMN

If you are graduating or moving to a different institution and you are expected to collaborate on research with University of Minnesota faculty or staff, we recommend the following:

- **Have a conversation about continued access.** Check with your research advisor, principal investigator, or other UMN-employed collaborators to determine what kind of access to data or systems you may need after you leave the University. In some cases, a Person of Interest (POI) account is appropriate. A POI account will require departmental approval and can be requested by completing the [POI request form](#).
  - **Note:** You can access files shared in Google Drive and Box with an external email account.

- **Share contact information.** Make sure you share an updated email address with your collaborators.

**Learn More and Consult with Experts**

[Research Data Services (RDS)](#) is a partnership between the University Libraries and LATIS. RDS offers training and support for University researchers.

- Enroll in a self-paced course, such as [Managing Data When You Graduate](#)
- [Request a consultation with Research Data Services](#)
- [Learn good practices](#) on the Research Data Services website

**Return Equipment**

**Return Computers, Phones, and Tablets**

Before you leave the University, you should coordinate with your supervisor or department to return computers, phones, and tablets.

If your device is supported by OIT and your department no longer needs it, you can learn more about [Recycling or Donating Computers within OIT](#).
Return Other Items

When you leave the University, there may be many items you need to return to your department in addition to computers, tablets, and/or phones. Review the list of potential items to return below and consult with your supervisor, human resources (HR) lead, or department head to ensure all items are returned.

Items that may need to be returned upon leaving the University:

- Duo tokens
- IT ID badges (your UCard does NOT need to be returned)
- Building keys
- Files and records
- External hard drives and flash drives
- Purchasing cards
- Department parking cards

If you worked from home, you may need to return office equipment, such as headsets, chairs, and monitors.
