Self-Help Guide

Recruitment CRM

This Self-Help Guide is intended for Campuses using Prospect Management functionality. Much of the basic navigation is the same and can be easily transferred to using a Contact as opposed to Prospect record but some functionality and fields may be different. Since different business practices will use functionality of the tool in different ways this Self-Help Guide is intended to be an overview of good practice and basic information on navigating and working with Objects and records of different types.

*Items with * may need higher level or manager permissions to access or complete all stated functionality. If you do not see functionality that you think you should have access to check with your internal business processes. There may be a hierarchy of approval you need to engage in order to change your permissions.
