Self-Help Guide

Box Secure Storage: Work with Files and Folders

Box Secure Storage is a cloud storage and collaboration service configured to meet the University security standards for HIPAA data. Meeting UMN security standards means that certain features of Box have been disabled or configured specific to compliance requirements. Box can be used for storing varying types of sensitive data including PHI, SSN, drivers license, etc. Note the Box Secure Storage service is not appropriate for PCI data, specifically credit cardholder data.

Get Started with Box

Get a Box Account

Activate Duo Multi-Factor Authentication

Duo Multi-factor authentication adds a second layer of security to your login in addition to your password and is a required security feature for use of UMN Box Secure Storage.
