ITG Center Release Notes – April 26, 2015																
Module	Changes															
SDLC	<p>1. Development work that is simple or repetitive may not need formal design documents. This change adds the flexibility, for those users with security access, to skip both the Functional Design (FD) and Technical Design (TD) steps and move the SDLC directly into the Planned Work Build in Progress step.</p> <div data-bbox="435 468 1430 615" style="border: 1px solid black; padding: 5px;"> <p>Available Actions</p> <p>Ready for Assignment</p> <p> <input type="button" value="Ready for FD"/> <input type="button" value="Ready for TD"/> <input type="button" value="Ready for Build"/> <input type="button" value="Data Update"/> <input type="button" value="Place On Hold"/> </p> <p><input type="button" value="Cancel Request"/></p> </div> <table border="1" data-bbox="451 678 1430 1325"> <thead> <tr> <th>Button</th> <th>Next Workflow Step</th> <th>Notes</th> </tr> </thead> <tbody> <tr> <td>Ready for FD</td> <td>In Functional Design</td> <td></td> </tr> <tr> <td>Ready for TD</td> <td>In Technical Design</td> <td>If this button is selected inadvertently or the need for an FD is identified later, the workflow can be returned to FD.</td> </tr> <tr> <td>Ready for Build</td> <td>Planned Work Build in Progress</td> <td>If this button is selected inadvertently or the need for either type of design is identified later, the workflow can be returned to either FD or TD.</td> </tr> <tr> <td>Data Update</td> <td>Planned Work Build in Progress or Data Update Verification</td> <td>If the Migration Process field contains Data Update, the next step is Planned Work Build in Progress. If the Migration Process field is blank or is not Data Update, verification is required.</td> </tr> </tbody> </table> <p>2. An email notification will be sent to the person named in the OIT Developer field when:</p> <ul style="list-style-type: none"> • An SDLC reaches the Technical Design step • An SDLC reaches the Planned Work Build in Progress step 	Button	Next Workflow Step	Notes	Ready for FD	In Functional Design		Ready for TD	In Technical Design	If this button is selected inadvertently or the need for an FD is identified later, the workflow can be returned to FD.	Ready for Build	Planned Work Build in Progress	If this button is selected inadvertently or the need for either type of design is identified later, the workflow can be returned to either FD or TD.	Data Update	Planned Work Build in Progress or Data Update Verification	If the Migration Process field contains Data Update, the next step is Planned Work Build in Progress. If the Migration Process field is blank or is not Data Update, verification is required.
Button	Next Workflow Step	Notes														
Ready for FD	In Functional Design															
Ready for TD	In Technical Design	If this button is selected inadvertently or the need for an FD is identified later, the workflow can be returned to FD.														
Ready for Build	Planned Work Build in Progress	If this button is selected inadvertently or the need for either type of design is identified later, the workflow can be returned to either FD or TD.														
Data Update	Planned Work Build in Progress or Data Update Verification	If the Migration Process field contains Data Update, the next step is Planned Work Build in Progress. If the Migration Process field is blank or is not Data Update, verification is required.														

ITG Center Release Notes – March 13, 2015	
Module	Changes
SDLC	<p>A new value was added to the Migration Process field:</p> <ul style="list-style-type: none"> • Portal
